

## EduGate Project – Application Structure Overview

### 1) accounts/

Handles everything related to users, authentication, roles, and profiles. This app manages login, logout, registration, profile management, and dashboards for each role.

#### - Models:

- Profile: Stores additional user information and role (Admin, Teacher, Student, Parent).
- ParentStudentRelation: Links parents to their children (students).

#### - Views:

- register view (user registration)
- login view (authentication)
- logout view
- profile view (view/edit profile)
- dashboard view (role-based dashboard)

#### - Forms:

- RegisterForm
- LoginForm
- ProfileForm

#### - URLs:

- /accounts/register/
- /accounts/login/
- /accounts/logout/
- /accounts/profile/
- /accounts/dashboard/

#### - Templates:

- register.html
- login.html
- profile.html
- dashboard.html

-----

## 2) courses/

This is the core of EduGate. It manages courses, modules, lessons, and student enrollment.

### - Models:

- Course: Represents a course created by teachers.
- Module: Sections or units inside a course.
- Lesson: Lessons inside a module, may include text or video.
- Enrollment: Represents student enrollment in a course.

### - Views:

- course list
- course detail
- create/edit/delete course (Teacher only)
- create modules and lessons
- enroll student in course

### - URLs:

- /courses/
- /courses//
- /courses//enroll/
- /courses//create/
- /courses//modules/

### - Templates:

- course\_list.html
- course\_detail.html
- course\_create.html
- module\_create.html
- lesson\_detail.html

-----

## 3) progress/

Responsible for assignments, submissions, grading, and student progress tracking.

### - Models:

- Assignment: An assignment created by teachers.
- Submission: Work submitted by students.
- Grade (included in Submission): Stores scoring/evaluation.

- Views:

- assignment list for a course
- submit assignment (Student)
